

AVOIDING

Water Contamination and Pesticide Drift

A Workshop for Orchard Pesticide Applicators and their Supervisors

Keeping pesticides out of groundwater and surface water and preventing pesticide drift are two of the most important issues facing agriculture. This 4-hour workshop will give participants practical and effective tools to deal with these issues. Through demonstrations, an on-farm tour, problem identification exercises, and creation of personalized checklists, participants will learn ways that water contamination and pesticide drift can occur, what factors contribute to this, and how to reduce these risks. Participants may choose between identical English- and Spanish-language sessions.

FEE: Pesticide applicators and their supervisors are encouraged to attend together. There is a discounted registration fee for supervisor-applicator pairs attending from the same company. The registration fee for individuals is \$25. The registration fee for supervisor-applicator pair from the same company is \$35. Registration fee includes resource materials and refreshments. Participants will receive a certificate of attendance.

REGISTRATION: Space is limited, so register early. Register by mail as indicated below. Or register by fax using your American Express, Discover, VISA or MasterCard. Confirmation will be sent by mail and will include the starting time and directions to the workshop location.

REFUNDS: There will be **no refunds**, however another person can attend in your place.

CONTINUING EDUCATION CREDIT: PCA, QAC, QAL, and Private Applicator continuing education credit approved (2 Laws and 2 Other).

Funding for this project has been provided by the CDFA's Buy California Initiative and the USDA.
